Volume 15 1989 Table of Contents

No. 1 Megakaryocytopoiesis

pp. 1–314

Obituary: Bede Morris . . . . . A 4

J. Levin, M. Tavassoli, N.T. Williams: Editorial 1

M. Tavassoli, M. Aoki: Localization of Megakaryocytes in the Bone Marrow 3
K.M. Young: Commentary 15

P.E. Stenberg, J. Levin: Mechanisms of Platelet Production 23
J.G. White: Commentary 48

P.J. Handagama, D.F. Bainton: Incorporation of a Circulating Protein into Alpha Granules of Megakaryocytes 59
D. Zucker-Franklin: Commentary: The Relationship of Alpha Granules to the Membrane Systems of Platelets and Megakaryocytes 73

L. Corash: The Relationship Between Megakaryocyte Ploidy and Platelet Volume 81
J. Martin: Commentary 108
L. Corash: Reply to Commentary 118

N. Williams, H. Jackson, F. Walker, S.H. Oon: Multiple Levels of Regulation of Megakaryocytopoiesis 123
J. Levin: Commentary: Is Interleukin-3 a Physiological Regulator of Megakaryocytopoiesis, in vivo? 134

R.J. Hill, J. Levin: Regulators of Thrombopoiesis: Their Biochemistry and Physiology 141
E.M. Mazur: Commentary: Megakaryocytopoietic Regulation: The Forest and the Trees 167

P.A. de Alarcon: Megakaryocyte Colony-Stimulating Factor (Mk-CSF): Its Physiologic Significance 173
L.A. Solberg, Jr.: Commentary: Stimulators and Inhibitors of Megakaryocytopoiesis in Human Plasma 186

S.A. Burstein, T. Ishibashi: Erythropoietin and Megakaryocytopoiesis . . . 193
P.P. Dukes: Commentary: Modulation of Megakaryocytopoiesis by Erythropoietin Via a Direct Effect of the Hormone on Progenitor Cells 202

M.W. Long: Signal Transduction Events in In Vitro Megakaryocytopoiesis . . 205
N.T. Williams: Commentary 230
M.W. Long: Reply to Commentary 234

C.W. Jackson: Animal Models with Inherited Hematopoietic Abnormalities as Tools to Study Thrombopoiesis 237
S. Ebbe: Commentary 254

J. Breton-Gorius, J.L. Villeval, N. Kieffer, M.T. Mitjavila, J. Guichard, W. Vainchenker: Limits of Phenotypic Markers for the Diagnosis of Megakaryoblastic Leukemia 259
